PATENT
IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

In re Application of:)	
Calmer, Marion)	
Serial No.: 09/827,563)	Examiner: Unassigned
Filed: 04/06/2001)	
)	Art Unit: 3671
For: Strategic Spatial Realignment for)	
Attaching Cornheads to Combines))	

Applicant submits this amendment in response to the Office Action dated October 19, 2004 and the Notice of Non-compliant brief mailed on July 14, 2005. Subsequent to Applicant's submission of an appeal brief and examiner's review, applicant's attorney has been advised to file this request for continued examination to further prosecution of the present application. Applicant cancels all previous pending claims (1-28) and herein submits new claims 29-37 incorporating the patent specification disclosure.

CLAIMS

Applicant encloses a claim listing as required by 37 C.F.R. 1.121. Applicant herein requests that claims 1-28 be cancelled and claims 29-37 be examined. Newly submitted claims are distinguishable from cited prior art Rayfield (U.S. Patent #5,784,869 and fully supported by applicant's original patent application.

REMARKS

Subject matter at issue in this patent and as presented in claims 29-37 is for the modification of the structure to attach the corn head to the combine threshing unit. In describing and claiming the subject matter at issue, there are three distinct areas of the corn head that require description:
